Social Media Integrated, Context Aware Search Engine and Personal Assistant with Preferential Privacy

Project By:
Kandarp Khandwala-13
Snehal Rao-29
Rudra Sharma-44

Project Mentor:

Ms Anjali Yeole

Problem Statement

1. To develop a Search Engine for the Web which is
   - Context-Aware
   - Social Media Integrated
   - Enabled with Preferential Privacy
   - Location-based

2. To develop a Search Engine based Personal Assistant

Unique features

- Search results integrated with social media according to user's likes and dislikes.

- Optional preferential privacy mode which does not save user data and provides security.

- Context-aware cards which display latest information based on user's location and interests.

- A personal assistant which works for you in the background and gives your information as you need.

- An integrated framework which exposes APIs used by the application

Implementation

Demo
